

THE CITY OF REDMOND **Commercial/Multi-Family** **Building Permit Fee Calculation Worksheet**

This form must be completed for all Commercial and Multi-Family projects that involve new construction or an increase in square footage to correctly calculate the fees. Please note that a separate permit is required for **each building or structure** that is part of the project. **Complete one worksheet for each permit.**

1) **Determining Building Valuation:** The final determination of building valuation shall be made by the Building Official.

a) **For New Construction or Increases in Square Footage:** The value used in computing fees, based on UBC Table 1-A adopted by Resolution No. 1189, is determined on the basis of the valuation per square foot using the Building Valuation Data. Determination of the project square footage is based on gross area, defined below.

2) **Gross Area:** The gross area, used in conjunction with the Building Valuation Data and other data to determine the valuation of a building project, means the total area of all floors, measured from the exterior face, outside dimensions or exterior column line of a building, including basements, cellars and balconies, but not including unexcavated areas. Where walls and columns are omitted in the construction of a building, such as an open shed or marquee, the exterior wall of the open side or sides, for the purpose of calculating gross area, will be the edge of the roof, including gutters.

The City of Redmond uses the “**Good**” classification for residential construction in conjunction with the Building Valuation Data and **does not use any “Regional Modifiers”**. The information that you provide will be verified during the plan review process.
